SUSTAINABLE SEAFOOD SPECIALS

Chef Maloney has partnered with Safe Harbor Certified Seafood to deliver sustainable seafood options that are free of pathogens and radiation and have the lowest mercury levels possible. 100% of the seafood served at Aquaknox has been put through rigorous testing by Safe Harbor, whose standards are far greater than FDA requirements. Each featured dish will contain information on where the fish was caught and by what method, boat's name, captain's name and the exact longitude and latitude of the catch.
